

## *E-Sky HoneyBee CP3 RTF - 2.4Ghz*

### **Product features:**

1. A direct drive tail system provides incredible power and response for tail commands, all while eliminating tail rotor gears for greater efficiency and less maintenance.
2. 370 super motor provides super power for high performance flight. Simple mechanical structure design, easy maintenance.
3. Durable Material, capable of bearing most crashes without any damage.
4. High performance main rotor blade significantly increase their strength for performing advanced 3D maneuvers.
5. Helpful in practicing professional 3D aerobatic flight .
6. Fully assembled and tested in the factory, ready to fly out of box .

### **Specifications:**

- (1). Main rotor diameter:  $\Phi 540\text{mm}$
- (2). Length: 525mm
- (3). Height: 185mm
- (4). Weight: 410g
- (5). Power system: Super 370 motor
- (6). RTF
- (7). Control mode: normal, Mode 2 (throttle Left)
- (8). Transmitter: Standard 6 CH **2.4Ghz**
- (9). Mix controller: 3in1 controller + Receiver **2.4Ghz**
- (10). Servo: EK2-0508 digital servos
- (11). Battery: 11.1V 1000mAh li-polymer battery

**Package includes:**

- 1 x Helicopter Body, Completely build and ready
- 1 x 3-in-1 controller (with Gyro, mixer, ESC)
- 1x Receiver
- 1 x Transmitter: Standard 6 CH
- 2 x Digital Micro Servo
- 1 x Battery: 11.1V 1000mAh Li-polymer battery
- Charger
